

## REFRIGERATION ALARM PANEL

12/1/10

### Features:

- 10 channels standard
- Optional direct or delay dial-out
- Interfaces with control system
- Verbal and visual alarms
- Reset 15 minute delay feature
- Ideal for Supermarket applications
- Meets UL 873

### Description:

Prevents costly loss of products by monitoring pressure drop in the refrigeration system, temperature increasing above required level, or failure in the HVAC system. Reduces expensive nuisance calls to the maintenance department by having a 15 minute delay feature allowing management to assess the situation during normal store hours.

### Specifications:

Main Power Input Voltage: 24 VAC Class 2  
Signal Output Voltage: 24 VAC  
Channels: 10
